

Orkney Islands Council Consults on Impacts of Coastal Change and Flooding Across the Islands

Rising global temperatures are raising sea levels and increasing the frequency and severity of storms. Orkney Islands Council is seeking feedback from residents, businesses and community organisations on how coastal changes including erosion and flooding have impacted you.

The results of the survey will assist us in planning to manage the effects of climate change, coastal erosion and flooding into the future.

The survey closes on **17 October 2025**.
